CHALLENGE

Our Software Studio is the beating digital heart of Capital One. It's here that we create the accessible, user-friendly products and services that our customers love. Now we're testing you to see if you've got the game-changing build more of these products.

Choose to accept this challenge and you'll be going up against some of the brightest minds in Silicon Valley. Capital One is always on the lookout for talented software engineers, if you perform well on the challenge we get in touch to discuss possible employment opportunities. Sounds good, right?

To have a trial run and limber up your grey matter before the competition challenges, why not take our Trial Challenge first? May your mind be lucid and your fingers nimble. Good luck!

By submitting your answer, you're supplying your email address to the third party website HackerRank.

Trial Challenge 4

Crossword

Pre-screen interested candidates without lifting a finger by letting them solve CodeChallenges embedded directly on your careers page.

Leverage our **built-in library** of over 45,000 CodeChallenges or **build your own** custom CodeChallenge that measures exactly what you're looking for.

CodeChallenges are **auto-scored** and **e-mailed directly** to you for review. When a candidate passes the initial pre-screen, invite them to complete a more thorough programming assessment.

8 QUESTIONS 90 MINUTES PLATFORM HELP

INSTRUCTIONS

1. This is a programming test
2. You are free to choose any language from the list and code
3. If the code area contains the function signature, just complete the function alone, we'll take care of the main function, headers, etc
4. If you're expected to write the full code, it'd be mentioned in the code area. All inputs are from STDIN and output to STDOUT. If you're using Java, use the classname as 'Solution'
5. To understand more about the environment, time limits, etc. you can read the [FAQ here](#)
6. You can print to console to debug your code using the appropriate print command for each language (Eg: cout for C++, printf for C, etc.)
7. It is okay to use reference language documentation or use an IDE that has code completion features. However it is not acceptable to consult/copy code from any source including a website, book, or friend/colleague to complete these tests.

Please fill all the details mentioned below

Email address/Login

Full Name

I will not consult/copy code from any source including a website, book, or friend/colleague to complete these tests, though may reference language documentation or use an IDE that has code completion features.
