

HackerRank/Work

HackerRank is an end-to-end technical skills assessment platform that is the standard for assessing developer skills for over 1,200 companies across industries and around the world.

By enabling technical recruiters and hiring managers to objectively evaluate talent at every stage of the recruiting process, HackerRank helps companies identify skilled developers faster, increase candidate quality, and recover valuable recruiting and engineering time.

HackerRank for Work ATS Integrations

The HackerRank for Work platform integrates with most popular Applicant Tracking Systems (ATS) in order to simplify candidate tracking and accelerate the technical hiring process. These integrations boost productivity by enabling you to send assessments to candidates, manage interview invites, and view results—all without leaving your ATS. By integrating HackerRank with your ATS, you can:

- Seamlessly complete HackerRank tasks from your ATS platform
- Manage candidate assessments and interview feedback to drive timely communication with candidates
- Unify and access all candidate information in a single location
- Eliminate errors due to manual data transfers between recruiting systems

HackerRank ATS Partners

HackerRank integrates with leading ATS platforms, including:

Don't see your ATS listed? We've got you covered. [The HackerRank for Work API](#) lets you build custom integrations that seamlessly and securely transfer data between HackerRank and your existing ATS.
