

HackerRank_CodeScreen

Pinpoint Top Talent Faster with Automated Technical Skills Assessments.

Join 1,100+ Customers Who Trust HackerRank to Help Hire the Right Technical Talent.

With HackerRank CodeScreen, you can:

Create code challenges

and send to candidates to complete.

Rely on HackerRank

to review all code for accuracy, quality and efficiency.

Review test scores

and select the top candidates to move forward with.

View detailed reports

to better understand how candidates solve challenges.

Improve Candidate Quality

Instead of resume reviews, rely on objective, skills-based assessments. Create customized challenges or select from a library of 1,500+ questions across 35+ languages, frameworks, job roles, and experience levels.

Save Candidate Screening Time

Replace phone screens with CodeScreen. Efficiently screen out unqualified candidates, so your time is well spent only with the most promising ones. Better yet, automated scores relieves your engineers from manually checking code.

Deliver a Great Candidate Experience

Give code challenges in a real coding environment, so they can demonstrate their true technical skills. Our coding environment supports familiar developer tools, so they can focus more on problem solving and worry less about irrelevant aspects of coding.

Support an Unbiased Hiring Process

Drive a hiring process across the organization that is consistent and compliant. Reduce bias and promote diversity with automated scoring and data anonymization.

Assess Skills Across All Job Levels and Roles

Assess for all levels from university recruiting to mid-senior level developers. HackerRank has assessments that span the wide range of your technical needs from programming fundamentals to real world application development.

Get Strategic Guidance and Actionable Insights

Our global customer success team will be there from day one to make sure you are set up for success, offering strategic guidance and sharing best practices gained from working with over 40,000 tech recruiters and hiring managers.

Code Assessment Features

Content Library

- 1,500+ pre-built questions
- Custom questions support
- 35+ programming languages
- 8 frameworks
- Content refresh and validation
- Question tags
- Insights on question performance

Role-based Assessments (RBA) Supported

- Front-end
- Back-end
- Full Stack
- Web development
- DevOps
- Database

Code Analysis and Reporting

- Automated test scores
- Test case results
- Best-in-class plagiarism detection
- Code diff, snapshots and timeline
- Code snapshots
- Code review in IDE (RBA)
- Downloadable reports

Enterprise Recruiting Features

Candidate Experience

- Best-in-class IDE (RBA)
- Autocomplete
- Linting
- Multiple files
- Terminal windows
- Git integration
- Code stubs
- Test cases
- Debugging

Enterprise Readiness

- Teams management
- Secure, reliable, scalable technology
- Comprehensive audit logs
- GDPR compliance
- ISO 27001 compliant
- ATS integration
- Open APIs
- SSO

Customer Support

- Dedicated account manager
- Strategic guidance
- Global customer support

*"With HackerRank, we were able to optimize our initial screening process by an average of **75%**, while boosting the quality of candidates."*

Tony Torelli, Senior Technical Recruiter at VMware. [Read More](#)
