

Diversity and Inclusion Center

In tech hiring, diversity and inclusion (D&I) is a must have. But candidate information such as name, school, and more can unconsciously bias hiring decisions, and inadvertently weed out strong candidates. With a skills-based hiring approach and the Diversity and Inclusion Center features, HackerRank enables you to integrate D&I best practices into your tech hiring process.

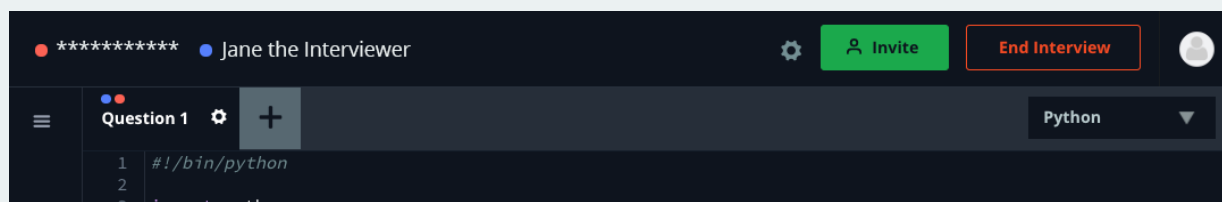

With the D&I Center, you can:

Programmatically root out unconscious bias by removing candidate Personally Identifiable Information (PII) like name, email and gender at critical hiring stages: from screening to remote pair programming interviews.

- Hide candidate PII in CodeScreen and CodePair reports

- Make CodePair sessions anonymous by hiding names and by disabling audio and video chat

- Hide candidate PII on the candidate list page

CANDIDATE	STATUS	SCORE %	INVITED BY
 *****	To evaluate	94%(94.2857/100)	Public URL
 *****	To evaluate	80%(79.5833/100)	Public URL

Provide an inclusive interview experience with custom accommodations for candidates with disabilities. Provide additional test-taking time as needed on a case-by-case basis.
