

Professional Services

At HackerRank, we understand your company is unique in how you source, identify, evaluate and recruit your technical talent.

HackerRank Professional Services facilitates onboarding and increases internal adoption so you can maximize the value of HackerRank across your recruiting and technical teams.

We also customize content for your environment and deliver one-off capabilities and requirements for features that do not “fit” in our broader product roadmap

EVENTS

Attract new technical talent for brand building and hiring

HackerRank works with your recruiting events team to plan and organize recruiting events. You get creative assets for your campaigns to drive registrations. Lean on us for support during the event, and we also help coordinate pre- and post-event activities. Our advanced software monitors for plagiarism and proctors all submissions to monitor for cheating.

CUSTOM CONTENT

Customizable assessment questions

We understand that leading brands have high standards for recruiting. You test for culture and values fit at every stage of your interview process, including technical skills screens.

HackerRank offers custom content development to help you provide assessments that are true to your culture and employer brand.

TEST VALIDATION

Valid, Fair and Compliant with EEOC and OFFCP requirements

Hire based on meritocracy. Issue each candidate a valid and reliable pre-employment test to add consistency and standardization to your hiring process. Ensure your assessments are fair to all test-takers regardless of personal characteristics such as gender, ethnicity, or ability status.

INTEGRATION

Technical talent recruiting and assessment workflows within your ATSment questions

HackerRank understands that talent operations teams like to stay within their Applicant Tracking System (ATS) for their various recruiting workflows. We can help reduce barriers for adoption. Your technical talent recruiters can create, send, and track HackerRank assessments and interviews all from within your existing ATS.

About HackerRank

HackerRank, the developer skills company, helps businesses attract, evaluate and hire the best technical talent from around the world. Over 2,600 customers across all industries, including 25% of the Fortune 100, rely on HackerRank to raise their hiring bar. More than 16 million developers (approximately 40% of the global developer population) trust HackerRank to learn and showcase their coding skills. Every second, two developers complete a HackerRank code submission, or 188,000 per day.
