HackerRank | For Work

Get the Right Talent with Automated Skills Assessments

CodeScreen is the standard for assessing developer skills and has helped 1,000 companies across different industries to streamline technical recruiting, increase candidate quality, and recover valuable engineering time.

Time Savings

VMware reduced screening time by 75% - one engineer's annual time. Reliable skills data replaced the need for technical phone screening.

Automated Assessments

Administer your test - we'll do the rest. Screen consistently, allow candidates to self-disqualify, and fast-track those who meet your skills requirements.

Dimensions of Insights

Examine front-end, back-end, and core computing skills. Evaluate each based on problem-solving, debugging, code quality, and optimality.

Great Candidate Experience

Give candidates the coding environment they need. Our Full-Stack Editor provides instant code validation, folder structures, and terminal windows.
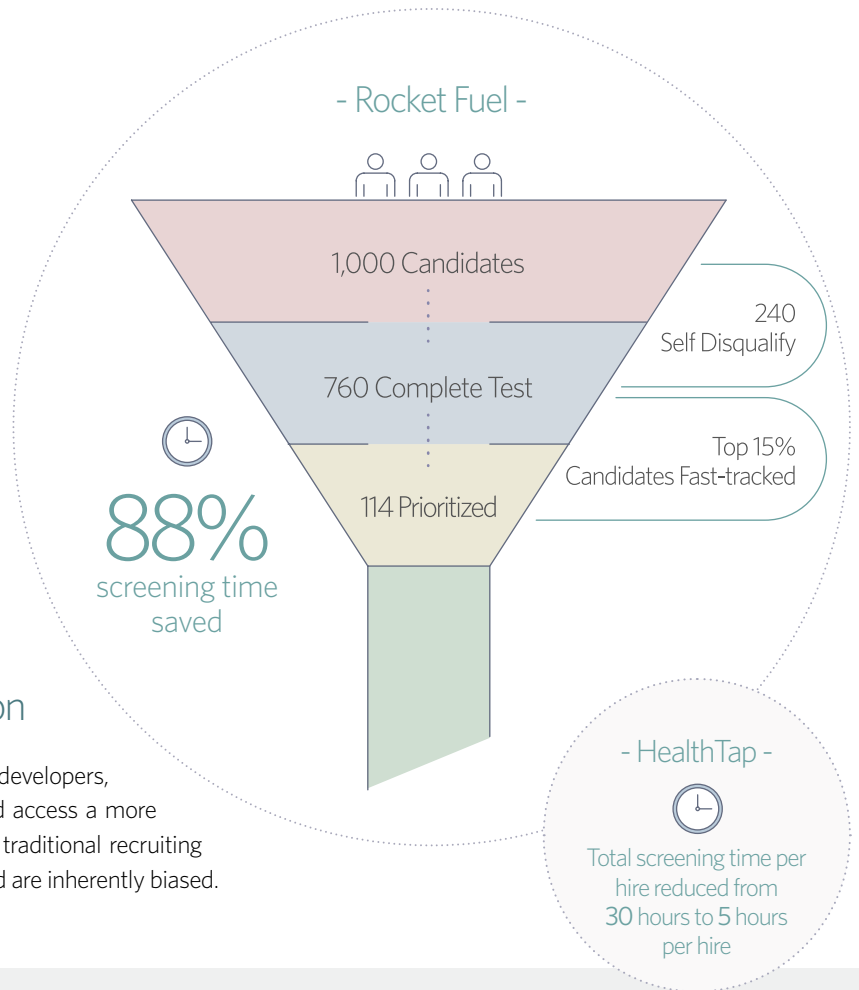

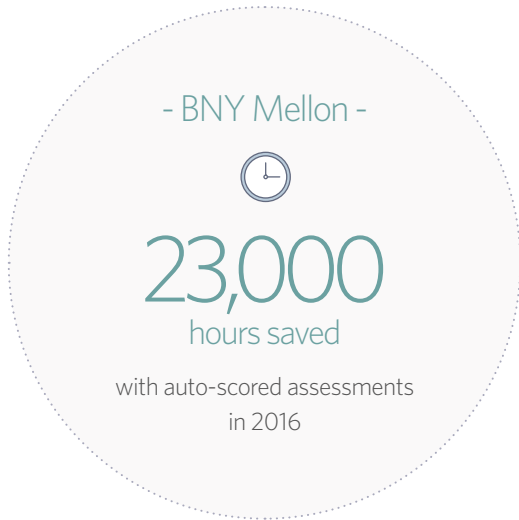

Questions Library

Select from our Library of pre-built questions for 35+ languages. Clone, customize, or create your own. Premium Questions are also available.

Support for Success

We value our relationship with you. The HackerRank Team will be by your side to ensure your success at each stage - from onboarding to ongoing.

Experience the Skills-Based Revolution

HackerRank helps companies save time, hire more qualified developers, and innovate faster. Companies can cast a wider net and access a more diverse set of candidates who may be filtered out using traditional recruiting methods that prioritize pedigree, connections, location and are inherently biased.

Total screening time per
hire reduced from
30 hours to 5 hours
per hire

"HackerRank is a true partner. The time saved by building strong assessments for technical candidates helps us scale and strengthen our engineering team worldwide."

Sara Hollister
VP Silicon Valley Innovation Center
@ BNY Mellon

"With the coding aptitude tested and out of the way... we now get into far more depth on the developers thought process and rationale... a huge intangible benefit of using HackerRank."

Abhinav Gupta
Co-Founder & VP Engineering
@ Rocket Fuel

"[HackerRank] allowed us to bring through - with less resources, time, and effort - much higher-level candidates.... It gave us the chance to vet people for technical skills and cultural values."

Jordan Pease
