# Everything You Need for Reliable, Robust Coding Interviews

CodePair is the most advanced interview platform in the industry. Interview anyone, anywhere - communicate with your candidates and see how they code and solve challenges in real-time. Get greater insights than any whiteboard can provide.

Video, Audio and Text Chat

CodePair supports audio, video and chat - all in one browser.

Key-By-Key Interview Replay

With every keystroke recorded, you can review all solutions at any time.

Great Candidate Experience

Our Integrated Development Environment provides a natural coding environment.

ATS & API Integration

We support integrations with Greenhouse, Taleo, iCIMS, Lever, SmartRecruiters and more.

More than 35 Languages

CodePair supports more than 7 domains such as algorithms front-end development, database programming and 35+ languages.

99.9% Uptime Guaranteed

Spend less time worrying about setting up and more time getting to know your candidates.

CodePair Features

Code Snapshots

Additional Scratchpad for Notes

Lockable Pads

Multiple Pads per Session

Candidate Page/History

Reports Shareable as Link

Reports Shareable as PDF

Predetermined Test Cases Per Question

ATS Integrations

Ability to Draw Diagrams

"Codepair is very useful to collaborate with candidates and watch their thought process evolve as they work through a problem. Without CodePair, a phone screen interview would be much less effective."

Etienne Le Sueur
Senior Technical Staff member @ VMware
